

## General Laborer

Lucas Industries, a PCM INNOVATION COMPANY, is a growing manufacturing enterprise that specializes in precision aerospace tooling and parts. We are currently seeking a motivated and reliable individual for our pattern department. Lucas Industries offers an excellent benefit package including paid time off, holiday pay, health and disability insurance and a 401K retirement plan.

### **Responsibilities:**

The General Laborer will work in our Patternshop, this individual is required to set up, operate and maintain a variety of hand and power equipment to produce the company's products. May also fabricate and modify parts to support product manufacturing. Apply knowledge of mechanics, shop mathematics, material properties and layout to the tool making process. The General Laborer will also be responsible for inspection and handling of products, equipment and materials. All responsibilities are performed per the Company's quality system procedures.

The individual may also assist with building and grounds care. Repair work including painting, bulb replacement and carpentry. Maintenance work such as shoveling, cleaning and trash removal are also required.

### **Position requirements:**

- Two or more year's wood working experience with exposure to various power tools is preferred.
- Strong attention to detail.
- Moderate to heavy lifting.
- Capable to be on your feet most of the day.
- Work as part of a team and be able to take instructions from a variety of co-workers.
- Cross training and work in other areas of the shop may be required.
- A valid driver's license.
