

LUCAS INDUSTRIES

A PCM INNOVATION COMPANY

Engineering, Tool Design & Manufacturing

Lucas Industries, a PCM INNOVATION COMPANY, is a growing manufacturing enterprise that specializes in precision aerospace tooling and parts. We are currently seeking a motivated and reliable individual for taping. Lucas Industries offers an excellent benefit package including paid time off, holiday pay, health and disability insurance and a 401K retirement plan.

Taping Position

Responsibilities:

- Clean work area to prepare for taping.
- Review taping pattern for foam part and verify labels. Refer to engineering summary sheet and material control plan for reference.
- Completely tape (encase) a machined foam part per instructions and quality stamp each box label when complete.
- Assemble cardboard shipping box and verify shipping crate is built.
- Package completed part into the single kit box per instructions.

Position requirements:

- Ability to remain productive in a repetitive work environment.
- Strong attention to detail.
- Moderate lifting required.
- Capable to be on your feet most of the day.
- Work as part of a team.
- Cross training and work in other areas of the shop may be required.
